■ 玉米

Corn

玉米為全球第二大作物，也是全世界總產量最高的糧食作物，台灣位於亞熱帶地區，適合種植玉米，秋冬季日夜溫差大所種植出來的玉米糖份特別高。使用非基因改造玉米，再利用真空，高溫高壓技術將玉米甜度完封，追求健康不添加防腐劑，遵循『生產履歷』追溯系統，讓顧客看見安心，吃得放心。

目前推出玉米棒，玉米塊，奶油玉米棒，玉米粒等，選用的品種為甜軟殼的玉米，其品種特性為生鮮玉米，甜度可達16度，鮮脆感十足。

Corn is the second biggest crop and the highest grain production in the world.

Taiwan, located on subtropical region, is suitable for planting corn. The sweetness of corn is especially high because the temperature in autumn and winter drops dramatically at night. For your health, we insist on using GMO-free corn without preservative and traceability system for tracking relevant information. Moreover, we use vacuum, high temperature and high-pressure technology to keep it fresh.

At present we have launched corn on the cob, butter corn, corn kernels, and so on. This type of corn we selected contains more sugar.

(slaughterhouse)

使用台灣優良農產品發展協會 (CAS) 驗證之豬肉屠宰廠，並經獸醫師檢驗合格豬血，安全及安心看的見
For the safety, we choose to a certified factory, which has awarded CAS certification. Our pig blood cake has passed the inspection standard through veterinarians

生產 Producing

與其他米血糕製造廠不同的是，我們使用高溫高壓殺菌釜來製造米血糕，也是台灣唯一不添加防腐劑的米血糕製造廠商
Different from other companies, Ru-Ji has used autoclave to produce the blood budding; besides, we are the only manufacturer who do not add preservatives.

進貨 Purchasing

豬血以全程冷藏的方式運送豬血至如記廠內，並儲存於0-3度C，白米來源為農糧署所提供，符合國家衛生標準；進貨之後溫濕度 (T: 20度C以下 ; H: 75%以下) 嚴格監控
Delivery of pig blood stored at 0° C - 3° C. Rice, which is offered by the Council of Agriculture, is conformed to sanitary standard. After the purchase, we will control the temperature and humidity. (T: below 20° C / H: below 75%)

包裝 Packing

20年前從德國進口真空包裝機來生產米血糕，讓米血糕不再是只限於販售傳統市場，而可以行銷全台，成為台灣米血的領頭羊
20 years ago, Ru-Ji had imported vacuum packaging machine from Germany to manufacture. As a result, the blood pudding is not only limited to selling on the traditional markets, but it can also be sold to everywhere in Taiwan.
